

HENNIKER SCHOOL DISTRICT**EDUCATIONAL PHILOSOPHY**

Henniker is a small community which values the security and individual attention that are unique to our size. Our goal is to develop in our students the ability to be successful in any environment.

The school should provide a challenging and stimulating educational experience, emphasizing strong academic skills. The development of a positive self-concept in students is essential. Students should learn tolerance, effective citizenship, responsibility, and acceptable social qualities.

The personal, social, and academic needs of students are best met in an atmosphere of flexibility, one that provides opportunities to foster the creative spirit, and accommodates a wide variety of learning styles.

It is important that the school and community work together. The school must not be an entity unto itself. Active involvement between staff, students, parents, and community is critical to a successful and relevant school.
